2012 Workers' Compensation Insurance Manual Rates

Many Operators are self-insured, making it difficult to determine the amount the Operator should charge for this assumption of risk, and difficult for auditors to verify. COPAS enlisted the services of an actuarial firm to provide manual rates, which form the upper limit for self-insurance.

Model Form Interpretation #31 states that COPAS will publish, on an annual basis, Workers' Compensation Insurance Manual Rates for certain job classifications. The following rates were calculated by a third party on behalf of COPAS. COPAS believes these rates were compiled in accordance with MFI-31, and are published only as a convenience to the industry. However, COPAS or its agents accept no responsibility for the accuracy of the rates or how the rates are actually utilized by various companies in their billing practices.

*Rates include the following employer's liability coverage:

Bodily Injury by Accident: \$100,000 - each accident
 Bodily Injury by Disease: \$100,000 - each employee
 Bodily Injury by Disease: \$500,000 - policy limit

Remarks:

A - California does not promulgate a USL&H percentage, but rather leaves that to the discretion of each insurer.

B - Kentucky rates include a 6.5% provision for the assessment for the Special Fund, which is outside of the manual rate.

C - Maryland rates include assessment of 2.05 cents per \$100 of payroll.

D - North Dakota – Cap of \$25,500 on wages applies.

E - Ohio rates include Disabled Workers' Relief Fund assessment of 10 cents per \$100 of payroll.

F - Effective June 1, 2011, use of the 2011 Texas loss costs issued by NCCI were used in this report. This is the first time loss costs have been published in Texas.

G - Washington rates are per man hour. Private insurance is required for USL&H coverage.

H - Georgia, Ohio & Tennessee added back to rate schedule effective for 2011 report, due to unconventional gas (shale) activity in those states. Delaware not included since comparable classifications were not available.
